Turnitin enables instructors and students to check the similarity of student work comparing submissions to other sources on the Internet and in Turnitin's extensive database. Additionally, instructors can directly mark-up student submissions - saving your frequently used comments in libraries of "quick marks" for improved work flow - as Turnitin integrates into your existing Blackboard Learn.

Why Should I use Turnitin?

- Check for potential plagiarism
- Drag and drop frequently used feedback comments
- Leave voice comments
- Grade by rubric

How To Use Turnitin

Similarity Check

- Video: Use Quick Marks and Comments
- Video: View a graded turnitin assignment from Blackboard Learn (student)
- Video: Grading on iPad

PeerMark

CSU Chico discontinued support for Peermark. According to the Turnitin Product Roadmap, they are "no longer making any changes" to the current PeerMark product. Their long term goal is to "replace PeerMark with a new tool that instructors and students can use with ease."

Please contact a Technology and Learning Program consultant to discuss other peer review options, which include Google Docs, Blackboard Learn groups, etc.

Adding a Turnitin Assignment

Adding a Turnitin Assignment to Blackboard Learn

1. From Blackboard Learn, click on any folder where you want to add a Turnitin assignment.
2. From the content area, click the **Assessments** link, then select **Turnitin Assignment**.
3. Enter the assignment **Title** and **Point Value** (if points assigned).
4. Enter the **Start Date** when the assigned is available to students in Bb Learn.
5. Enter **Due Date**. There is an additional option to allow submissions after the due date.
6. If applicable, enter the **Post Date**. The Post Date is when students get access to grade comments if you are using GradeMark.
7. Click **Optional Settings** and specify the settings you want for this assignment.
8. Click **Ok** when prompted with the message Turnitin assignment successfully added.

**Grading a Turnitin Assignment**

**Accessing GradeMark from Blackboard Learn**

The quickest and most efficient method for instructors to access Turnitin is from Course Tools > Turnitin Assignments. This lists all of your Turnitin assignments in one place, as well as the option to sync your roster and grades, if needed.

1) **Navigate to Course Management > Course Tools > Turnitin Assignments.**
2) Select a Turnitin Assignment created for your course. This displays the Turnitin Assignment Inbox.

Click here to continue reading.

**Turnitin From Your iPad**

**Introduction Video**

**Prerequisites**

- You should have already installed the Turnitin iPad app from iTunes app store.
- You should already have an existing Turnitin assignment in your course with student submissions.

*Note: If you do not have student submissions yet, click View/Complete and submit a paper as a non-enrolled student. Submitting as a non-enrolled student excludes the paper from the Turnitin*
Known Issues & FAQs
For other FAQs and known issues, please view this Turnitin FAQ and Known Issues google doc from TLP.

**Error 423**
If you get an ERROR 423 the first time you use Turnitin, please consult the following FAQ article to learn how to fix it: Why do I get an error message when adding a Turnitin assignment to Blackboard Learn?.
